PROFESSIONAL PROFILE

Web Development Technician. Experience in computer maintenance, basic frontend and backend development, SQL databases, and office software. Recognized for being proactive, self-taught, with strong leadership, adaptability, and problem-solving skills. Collaborated on institutional projects such as the creation of process automation systems, informational websites, and more.

PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER – FREELANCE

- Design and development of modern, responsive landing pages for diverse clients.
 - Creation of a complete online appointment management system for a company, using React for the frontend, PHP for the backend, and Docker for environment management.
 - Implementation of features such as personalized schedules, validations, admin dashboards, and automated notifications.
 - Development of personal projects, including an inventory management system and an online menu platform for restaurants, focused on usability and efficient management.
 - Use of REST APIs to integrate external services and version control with Git.
- Development and implementation of secure and user-friendly electronic voting systems.
 - Design and maintenance of an educational institution’s website, optimizing performance and usability.
 - Leadership of full project teams and backend teams, coordinating tasks and ensuring development best practices.
 - Definition of architectures and technical supervision to guarantee code quality and scalability.
 - Collaboration in multidisciplinary teams to deliver comprehensive solutions, combining autonomy with teamwork.
